

HAZARDOUS MATERIALS POLICY

1. Sea Shipping Line does *not* accept the following hazardous materials:
 - Class 1 - Explosives
 - Class 2.3 - Poison Gas
 - Class 4.1, 4.2, 4.3 - Flammable Solids, Spontaneously Combustible, Dangerous When Wet
 - Class 5.1, 5.2 - Oxidizers, Organic Peroxides
 - Class 6.2 - Infectious Substances
 - Class 7 - Radioactive Materials
 - Spent Catalyst
 - Hazardous Waste
 - Hazardous Materials Requiring Temperature Control
2. The absence of any hazard class or division or a blank space in the table indicates that no restrictions apply.
3. The red letter “X” in the table indicates that these materials may not be loaded, transported, or stored together in the same transport vehicle or storage facility during the course of transportation.
4. The letter “O” in the table indicates that these materials may not be loaded, transported, or stored together in the same transport vehicle or storage facility during the course of transportation unless separated in a manner that, in the event of leakage from packages under conditions normally incident to transportation, commingling of hazardous materials would not occur. Notwithstanding the methods of separation employed, Class 8 (corrosive) liquids may not be loaded above or adjacent to Class 4 (flammable) or Class 5 (oxidizing) materials; except that shippers may load truckload shipments of such materials together when it is known that the mixture of contents would not cause a fire or a dangerous evolution of heat or gas.
5. The “*” in the table indicates that segregation among different Class 1 (explosive) materials is governed by the Compatibility Table For Class 1 (Explosive) Materials.
