

HURRICANE HARVEY UPDATE

As many of you have seen, Hurricane Harvey has caused extensive flooding in Houston and many residents have been displaced. Our thoughts and prayers are with all of those affected by this disaster.

Our Houston physical office is closed until the floods recede and until the situation in Houston stabilizes. As of this morning, all of our staff is safe although at least two have relocated to stay with family members temporarily as their own residences are in danger of flooding.

The situation is changing as the storm pattern shifts and we will keep everyone advised as the hurricane abates.

All of our staff have transferred their office phones to their cell phones or computers and are working on their laptops from home, as the situation permits.

As far as we know, all incoming emails from this weekend have been answered and we will be providing support from our other offices as needed.

Please be sure that you use the group email:
hou.customerservice@seashipping.com for all email requests or inquiries as individuals may lose power or internet at any time.

We will keep everyone advised and we thank all of you for your messages of support.
